

Installation of Real Motion Indicators on

1. Download (but do not open) the file “MG Real Motion NT8.zip” from the MarketGauge.com website.
2. In the Ninjatrader main console: Go to “Tools” → “Import” → “NinjaScript Add-On...”

3. Navigate to downloaded file location (either Desktop, Downloads folder, or wherever you downloaded the zip file in step one). Select file and click “Open”. You should get a message that it was successfully imported.

4. You can now setup or add the indicator to any existing chart.

First ensure that you have loaded a significant amount of data (1000 days recommended):

Next add the indicator to the chart:

You may need to manually adjust the color or width of some of the plots to your preference. You can also change the indicator settings adjusting inputs: “Length” and “Length2”

The screenshot shows the 'Indicators' dialog box with the following settings:

Property	Value
Length	50
Length2	200
