

## Installation of RealMotion Indicators on NINJATRADER®

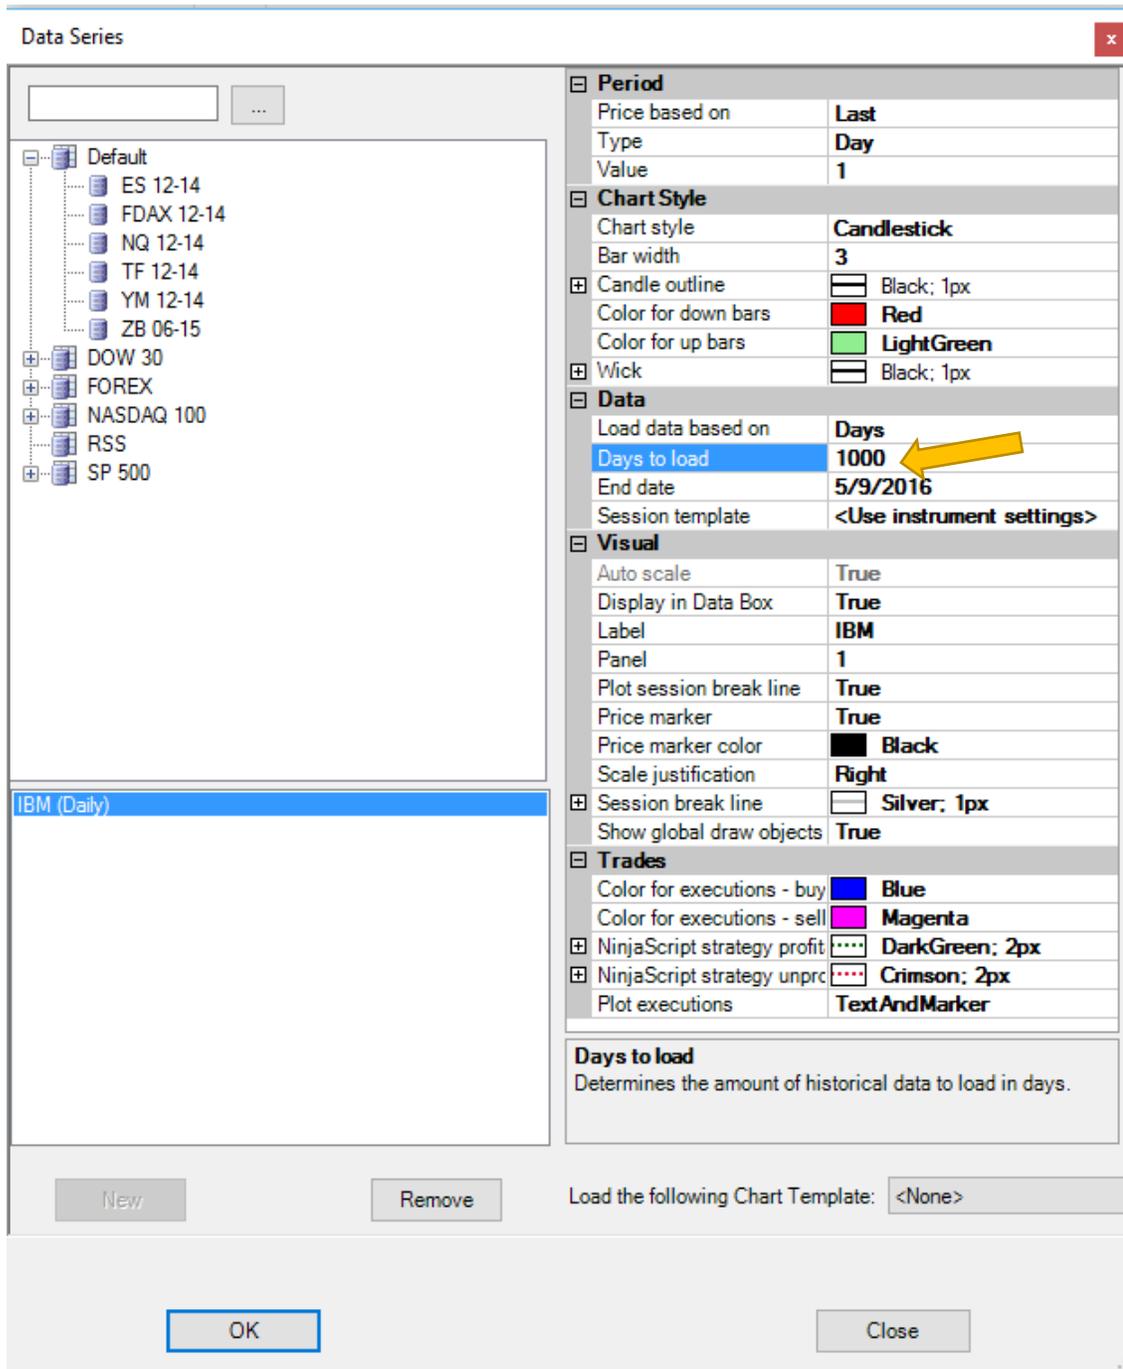

1. Download (but do not open) the file “MGRealMotionNinjaTrader.zip” from the MarketGauge.com website.
2. In the Ninjatrader main console: Go to “File” → “Utilities” → “Import NinjaScript...”

3. Navigate to downloaded file location (either Desktop, Downloads folder, or wherever you downloaded the zip file in step one). Select file and click “Open”. You should get a message that it was successfully imported.

4. You can now setup or add the indicator to any existing chart.

First ensure that you have loaded a significant amount of data (1000 days recommended):

Next add the indicator to the chart:

You will need to manually adjust the width of some of the plots to your preference.
