

## Installation of Triple Play Indicators on NINJATRADER® 8

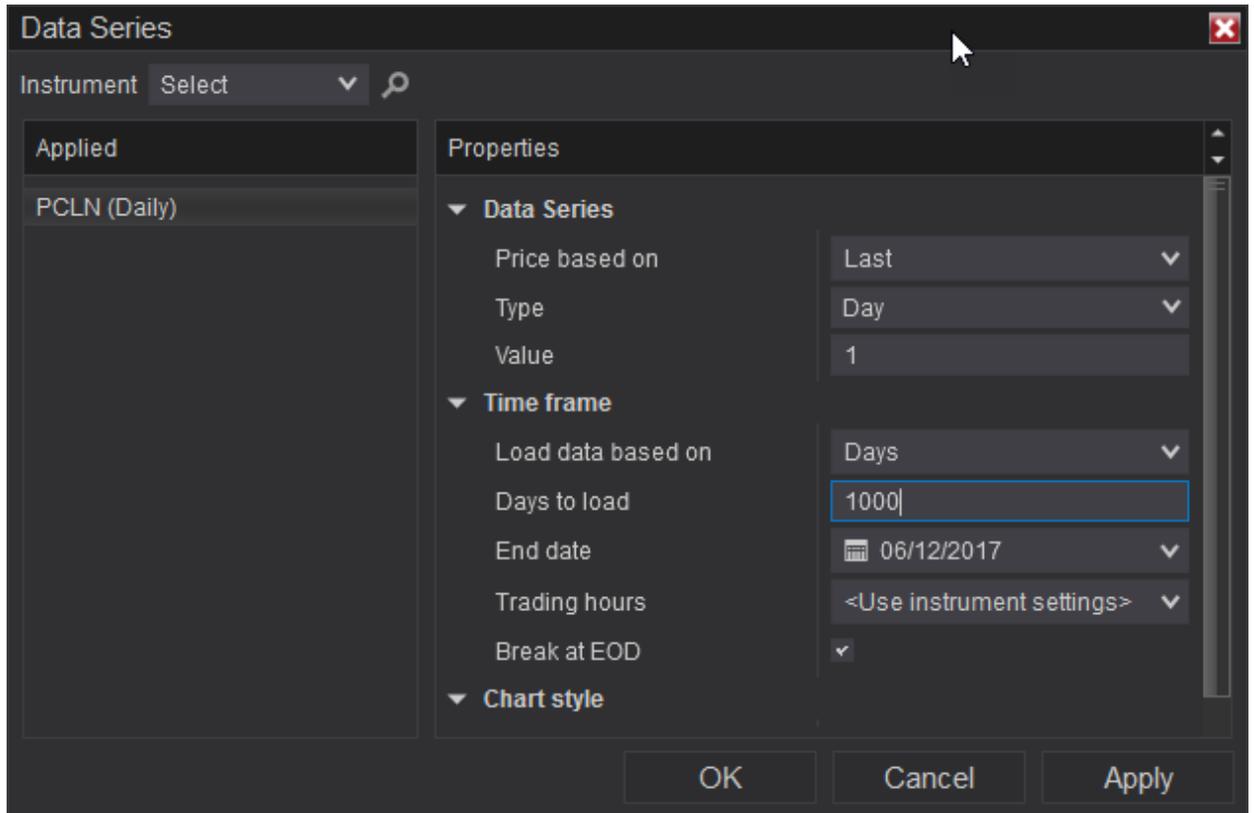

1. Download (but do not open) the file “MG Triple Play NT8.zip” from the MarketGauge.com website.
2. In the Ninjatrader 8 main console: Go to “Tools” → “Import” → “NinjaScript Add-On...”

3. Navigate to downloaded file location (either Desktop, Downloads folder, or wherever you downloaded the zip file in step one). Select the zip file and click “Open”. You should get a message that it was successfully imported.

4. You can now setup or add the indicator to any existing chart.

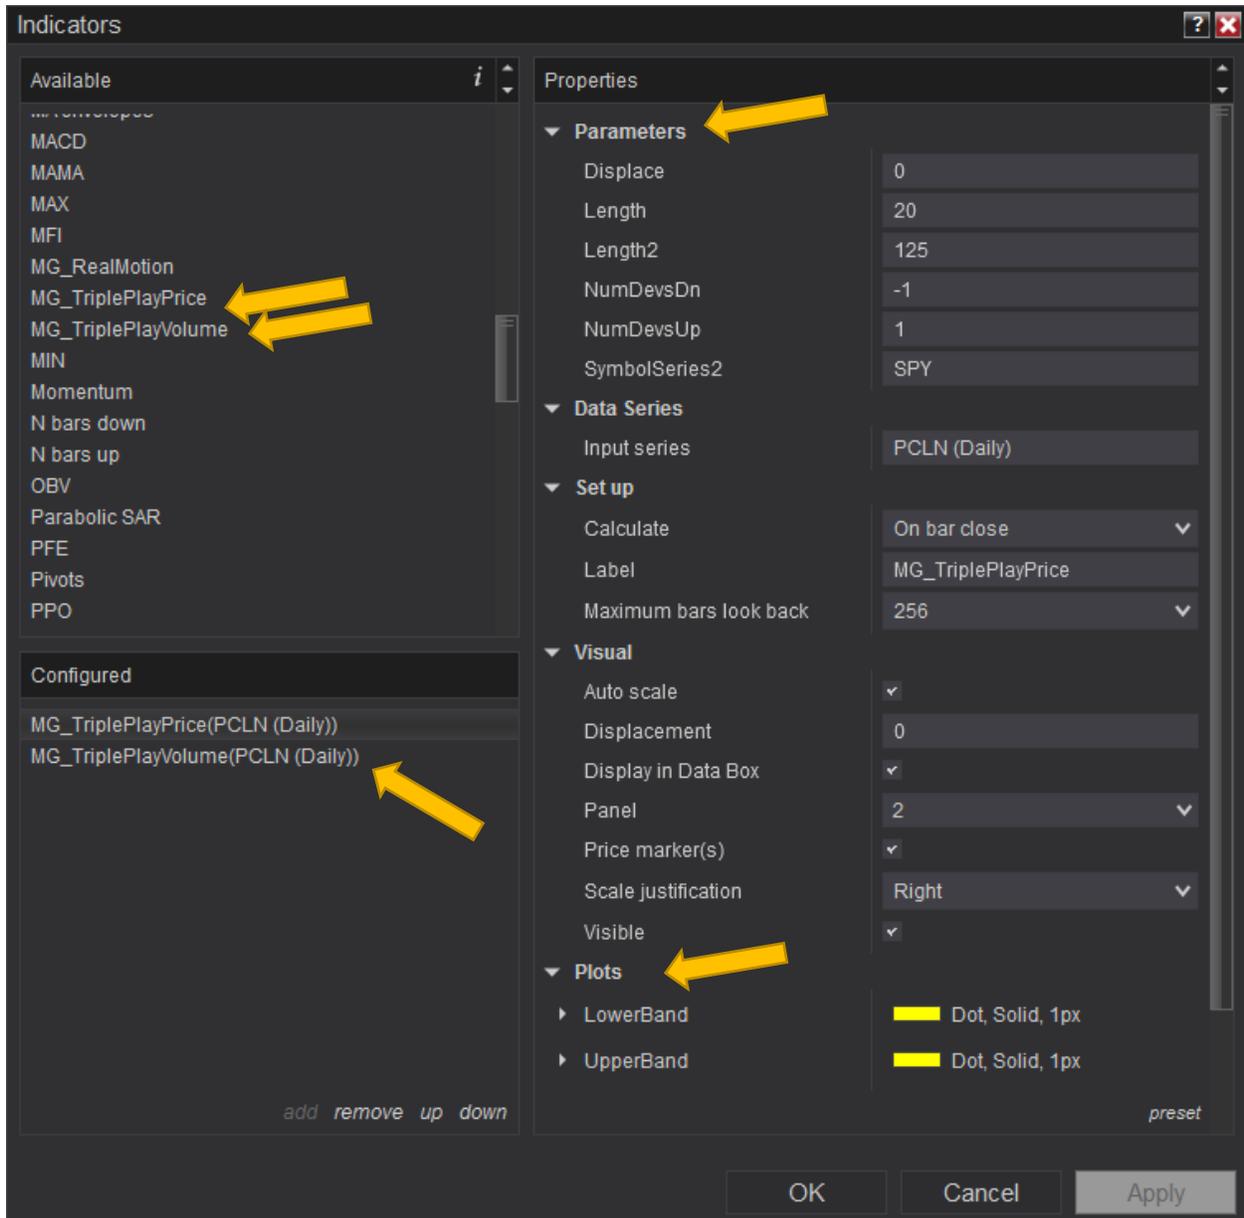

First ensure that you have loaded a significant amount of data (365+ days recommended):

Next add both indicators to the chart:

MG\_TriplePlayPrice & MG\_TriplePlayVolume

You may need to manually adjust the color or width of some of the plots to your preference. You can also change the indicator settings by adjusting parameters: “Length” and “Length2”

5. Depending on plot settings and style, your final display could look something like this:

If you run into any issues installing these indicators, please contact us via email, chat or phone.

For more information about how to use the indicators, please see training videos on our website.
