Installation of Triple Play Indicators on TRADE NAVIGATOR
BY GENESIS FINANCIAL TECHNOLOGIES

1. From our website, download the file "TradeNavigator.zip" – this will either give you the option to specify where you can save the file or it will automatically download it to your downloads folder.

2. The folder you downloaded contains one file that has to be unzipped/uncompressed. This can be accomplished several different ways:

   a. You can right-click on the zip folder and select "Extract All..." A window will pop up where you can specify the destination for the file.
   b. You can open up the compressed folder, highlight the file and right-click on it and select "Copy" – then "Paste" them onto your **desktop or any other folder**. (You can also use keyboard shortcuts "Ctrl-C" and "Ctrl-V".
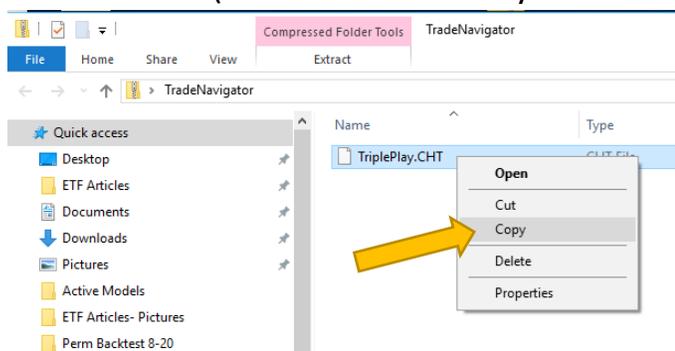

c. If you have WinZip or WinRAR installed, you can use either of those programs to un-compress the two files.

d. The important thing is that you need to get the file outside of its original compressed folder.

3. Once you have the file extracted and saved onto your desktop or other folder, we now have to move that file into the appropriate directory for the Trade Navigator platform. Navigate in windows to the folder: C: Drive > Genesis > Navigator Suite > Charts > Templates. Copy and paste the "TriplePlay.CHT" file into this folder.
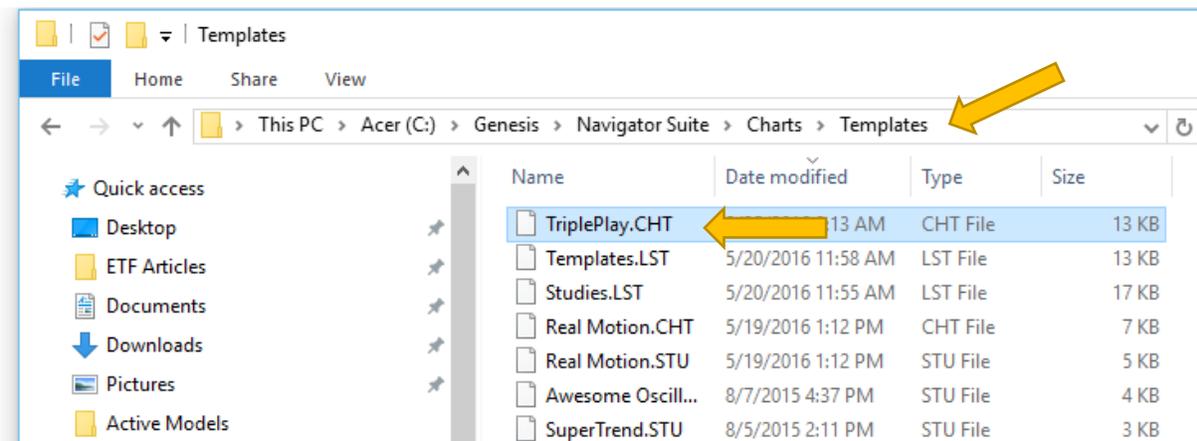

4. Open Trade Navigator to a standard daily stock chart. You should now be able to click on the "Templates" button in the top navigation bar and select "TriplePlay" from the drop down menu.
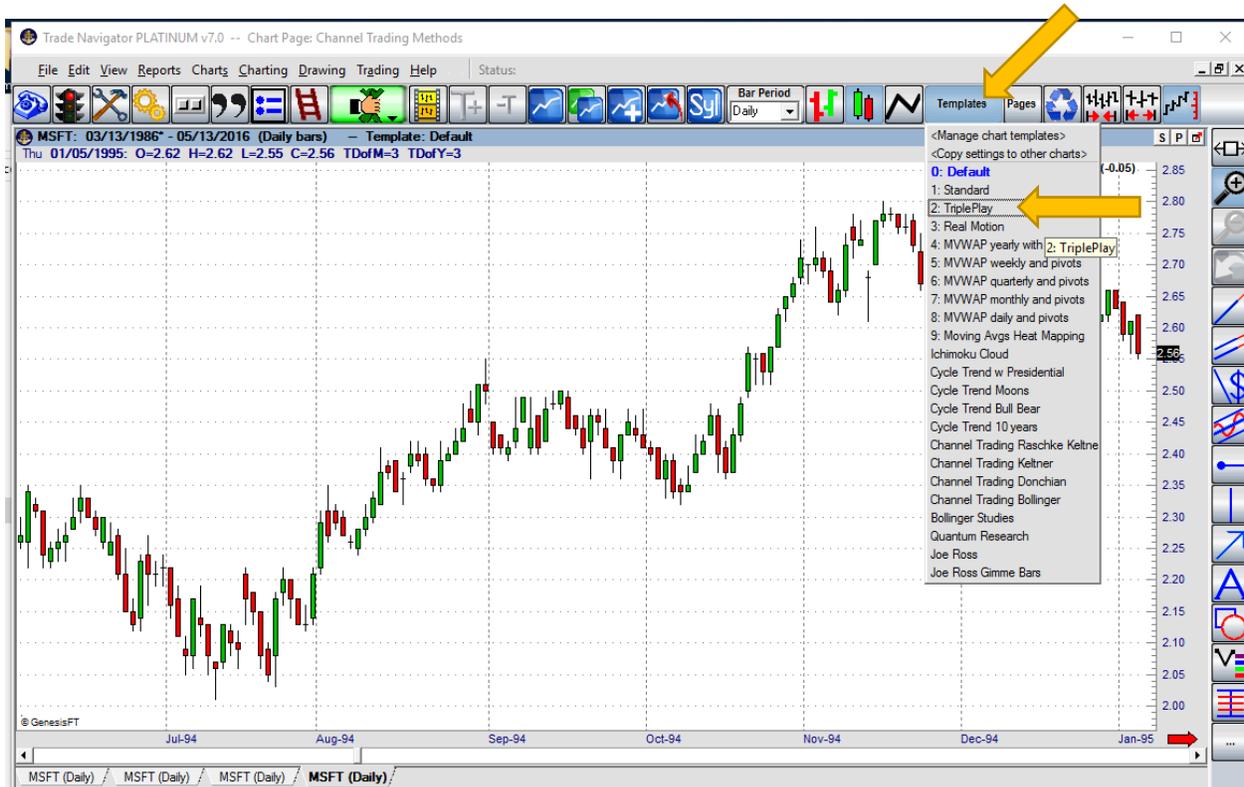

5. This will add the Triple Play indicators to the lower portion of the chart. From here you can customize and settings or appearances in the same way you would for any other indicator. You can also add moving averages or Bollinger bands to the top price series.

If you run into any issues installing this indictor, please contact us via email, chat or phone.
