About this report

This report is an abbreviation of MarketGauge's 6-Month Calendar Range strategy setup and indicators. If you're familiar with the details of this strategy and its tactics, this should serve as a reminder. If you're new to this concept, it's a starting point.

The data in this report is very timely data and therefore the date on the first page of this document should be considered.

- Who is this for?
 - The price levels defined by this trading method have proven to be insightful in all markets.
 - Longer-term investors can use this to identify longer-term trend inflection points.
 - Active investors can use the price levels identified by the July Range as entry points for trades that can last days, weeks, or months.
 - If you have our January/July Trend Trade instruction, then you should look closely at the initial O.R. patterns.
 - If you are a member of other MarketGauge services such as Complete Trader, Triple Play, Opening Range Mastery, Mish's Ultimate Training, I urge you to look at all stocks and markets with the edge of Triple Play, Opening Range and Calendar Range indicators.

If you'd like to take this to the next level with more detailed instruction, the indicators, additional trade ideas, and live mentoring...

Table of Contents:

- First Day Range – July Opening Range
- 10-Day Range – July Range
- Breakout Rules
- Reversal Rules
- Current Markets
- SPY Recent Years

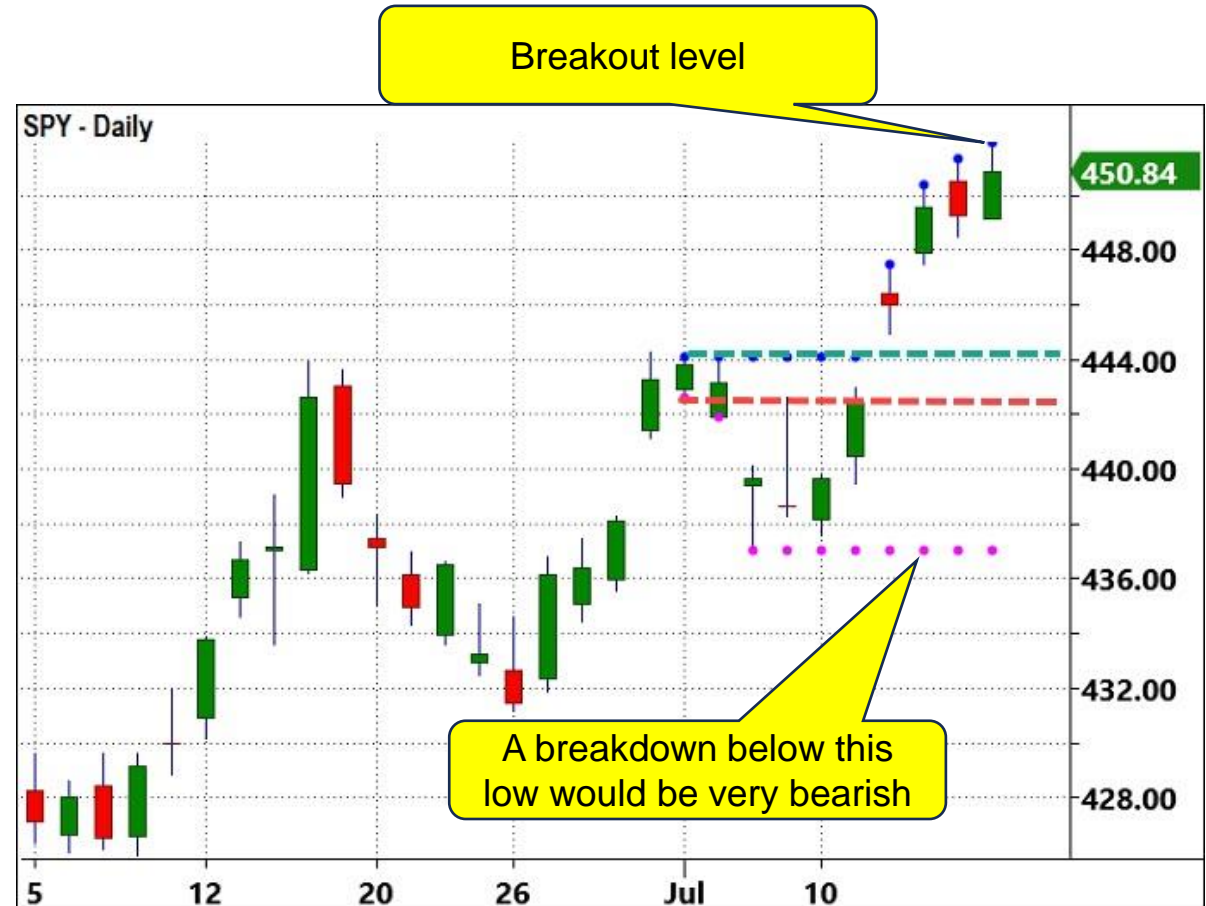

July O.R.: First Day & 10-day Ranges

- The first trading day creates a range to be traded for initial trends
- After the 10-day range is formed, the first day range is an important level of support or resistance

July O.R. Breakout

- The “Close & Continue” Breakout Pattern
 1. “Close” outside the range
 2. “Continue:” Trade beyond the range of the breakout day
 - With an intra-day 30-min O.R. breakout
- Stop levels
 - Close back in the range
 - Move below (above) the range of the day that broke out
 - Close & continue beyond the opposite range level

July O.R. Reversal

The Reversal Pattern

- Trade outside the July Range – may or may not close
 1. Close over the high of the low bar that broke the Range (bullish reversal) or close under the high bar that broke the Range (bearish reversal).
 2. Continue beyond the reversal day's range
 - WITH an intra-day 30-min. breakout
- Stop levels
 - Move outside the reversal days range
